PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with CGPA 9.0/10 and internship experience in Full Stack Development (Python) and Artificial Intelligence. Experienced in building web and mobile applications using Python, React, Flutter, Firebase and SQL. BuildX 36-hour hackathon participant, First Prize winner at a college Project Expo and Student Council Executive Member, seeking a software development internship.

EDUCATION

B.Tech – Computer Science & Engineering 2024–2028 | CGPA: 9.0/10
B.S. Abdur Rahman Crescent Institute of Science and Technology

Higher Secondary (12th) 95%
Narayana Junior College, Nellore

Secondary (10th) 89%
Madhava English Medium School

PROFESSIONAL EXPERIENCE

Full Stack Development Intern (Python) – Retech Solutions Pvt. Ltd. 06 July 2026 – 20 July 2026 | Online
- Completed Full Stack Development internship training using Python.
- Worked on project-based tasks involving a Student Freelance Marketplace.

Artificial Intelligence Intern – DecodeLabs 22 August 2026 – 22 September 2026 | Virtual
- Completed an AI internship involving practical projects and collaborative tasks.
- Developed a rule-based chatbot in Python.
- Built a Decision Tree classifier using the Iris dataset, Pandas and Scikit-learn; evaluated it using a train/test split and confusion matrix.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL
Web Development: HTML5, CSS3, React, Vite, Bootstrap 5, Responsive UI Design
App Development: Flutter, Android Development
Frameworks & Libraries: Django, FastAPI, Three.js, Pandas, NumPy, Scikit-learn, Matplotlib
Databases: MySQL, SQLite, Firebase Firestore
Developer Tools: Git, GitHub, VS Code, Android Studio, Figma
Core Competencies: Problem-Solving, Software Development, Database Management, Team Collaboration

PROJECTS

AeroInspect AI (Wingsight) – Aircraft Inspection Platform
Technologies: Python, FastAPI, SQLite, React, Three.js, Tailwind CSS, PyTorch/YOLOv8
- Built a full-stack aircraft inspection platform with JWT authentication, role-based access and a 3D aircraft viewer.
- Implemented PDF inspection reports with SHA-256 audit hashes and a pluggable defect-detection pipeline; drone missions and telemetry are simulated for demonstration.

CampusLance – Student Freelance Marketplace
Technologies: HTML5, CSS3, Bootstrap 5, JavaScript, Python, Django, MySQL, Groq API, GPT-OSS/Qwen
- Developed a student freelance marketplace connecting students with clients for project-based opportunities.
- Implemented Django authentication, MySQL backend and AI integration through Groq API using configurable GPT-OSS/Qwen models.

Livestock 360 – Smart Livestock Management Platform
Technologies: Python, Django, HTML5, CSS3, JavaScript, SQLite, Pandas, NumPy, Scikit-learn, Random Forest, Joblib, SciPy, Web Speech API
- Developed a web-based livestock management platform with machine-learning-based prediction capabilities.
- Implemented Random Forest classification, data preprocessing, One-Hot Encoding and voice-enabled interaction.

VetRadar AI – Veterinary Intelligence Platform
- Built VetRadar AI, an AI-focused veterinary intelligence platform, as a separate project from the existing VetRadar website.

RupeeRise – Personal Finance & Financial Literacy Platform
- Developed a scroll-based animated personal finance website for the MoneyMatters / Code Canvas hackathon.
- Delivered interactive financial education content, budgeting concepts and engaging visual storytelling through a modern animated web experience.

HACKATHONS & ACHIEVEMENTS

- Participated in the **BuildX 36-Hour Hackathon** and multiple other hackathons.
- Won **First Prize** for EcoEye at the College Project Expo.
- Attended a Microsoft Azure Cloud seminar at college.

LEADERSHIP & ACTIVITIES

- **Executive Member, Student Council** – B.S. Abdur Rahman Crescent Institute of Science and Technology.
